

Perform Analysis of Current Design and Review Iteration Goal and Achievement of Design Purpose

Not Addressed	Partially Addressed	Completely Addressed	Design Decisions Made During the Iteration
		UC-5	Chooosed the reference architecture which establishes the modules that will support this functionality. All modules needed for implementing this functionality have been identified.
		UC-9	Chooosed the reference architecture which establishes the modules that will support this functionality. All modules needed for implementing this functionality have been identified.
		QA-1	The use-cases related to this quality attribute(UC-4 and UC5) have been completely identified and addressed.
	QA-3		No relevant decisions made.
	CON-5		Chooosed the reference architecture that contains modules will help support this functionality.
	CON-6		No relevant decisions made.
	CON-8		No relevant decisions made.
		CRN-2	Modules associated with all of the use cases have been identified.
